

Home Environmental Assessments Checklist

Project Goal:

- **Individual Grantees:** Complete at least five environmental assessments in homes where children with asthma live
- **Group Grantees:** Complete at least five environmental assessments in homes where children with asthma live per nurse

Preparation:

- ☐ Advertise free environmental assessments to parents/guardians of children known to have asthma
- ☐ Download the Environmental Protection Agency's Home Environment Checklist from http://www.epa.gov/asthma/pdfs/home_environment_checklist.pdf
- ☐ Obtain smoke-free window clings and magnets from Matthew Herington
- ☐ Conduct an in-home walk-through and assessment for five homes where children with asthma live
- ☐ After completing the walk-through and assessment, assist the participants in choosing one or two things that they will change in their home as a result of the environmental assessment
- ☐ Provide smoke-free window clings and magnets to all participants
- ☐ If there are tobacco smokers in the home, direct them to the Montana Tobacco Quit Line (866-485-QUIT)

Follow-Up:

- ☐ After approximately 30 days, make a follow-up call to the people you have visited to determine what changes the participants have made
- ☐ Provide assistance in providing a copy of their environmental assessment to the child's healthcare provider

Report Results:

- ☐ Complete outcomes report form and return it to Matthew Herington by December 15, 2010
